

FEATURED PRODUCT

Curaphen®

Professional Pain Formula*†

Contains Clinically Studied BCM-95® Curcumin and BosPure® Boswellia

Curaphen® is for pain relief! This unique and proprietary formula supports healthy endorphin/enkephalin activity, and healthy circulation.* BCM-95® Curcumin has better absorption than plain curcumin and BosPure® Boswellia is purified to reduce inflammation-causing compounds called beta-boswellic acids, while retaining >10% AKBA.

Recommendations: One capsule three times daily, or as directed by your healthcare practitioner.
If pregnant or nursing, consult a healthcare practitioner before use.

† Occasional muscle pain due to exercise or overuse.
All ingredients established in human studies for safety and effectiveness.
Does not interfere with stomach, liver or kidney function.

* THESE STATEMENTS HAVE NOT BEEN EVALUATED BY THE FOOD AND DRUG ADMINISTRATION. THIS PRODUCT IS NOT INTENDED TO DIAGNOSE, TREAT, CURE OR PREVENT ANY DISEASE.

Curaphen® is a breakthrough formula that combines clinically proven BCM-95® Curcumin and BosPure® Boswellia with DLPA and nattokinase to create a product that has been recognized and awarded throughout the natural products industry for pain relief.*†

You'll notice – and appreciate – the life-changing difference of Curaphen!

A unique combination, Curaphen combines ingredients with multiple mechanisms of action to relieve occasional muscle pain due to exercise and overuse.*

Powerful Ingredients!

- **BCM-95® Curcumin** has been clinically tested and shown in published studies to have **greater absorption and blood retention** time at significant levels than plain curcumin extracts.
- **BosPure® Boswellia** provides an extract with reduced beta-boswellic acid content to less than 5%, but assures at least 10% or more acetyl-11-keto-beta-boswellic acid (AKBA) content – which greatly increases its benefit.*
- **DLPA** (DL-phenylalanine) has been shown to help support the effects of endorphins and enkephalins, the body's own powerful pain relievers.*
- **Nattokinase** helps promote blood flow, aiding the other ingredients in Curaphen to reach all areas of the body.*

Frequently Asked Questions for Curaphen®:

Q. Is Curaphen safe for people with heart, liver or kidney conditions?

A. Anyone with a chronic condition should of course consult a healthcare practitioner prior to the use of any supplement. However, there are no specific safety issues using Curaphen. Studies have shown that the ingredients in Curaphen are actually health supportive of these systems.*

Q. Why is the BosPure® in Curaphen screened to reduce beta-boswellic acid?

A. While most boswellic acids are associated with positive benefits, beta-boswellic acid is pro-inflammatory. Keeping it to less than 5% enhances the effectiveness of BosPure® Boswellia.

Q. Can I take Curaphen on an empty stomach?

A. Yes, you can. Many people prefer to take supplements with food, but Curaphen is effective regardless of when you take it.

Q. How does the BCM-95® Curcumin in Curaphen compare to other curcumin and turmeric products?

A. The proper product comparison is curcumin to curcumin. However, since many companies are comparing their curcumin absorption to turmeric, we provide this information as a service to our practitioner partners and their patients.

- Plain curcumin compared to turmeric delivers up to 50 times the curcumin as the same amount of turmeric.
- BCM-95® Curcumin has been proven to deliver up to 10 times more curcumin into the bloodstream as the same amount of plain curcumin.
- Therefore, when compared gram per gram, BCM-95® Curcumin delivers up to 10 times more curcumin than plain curcumin and up to 500 times more curcumin than that found in an equal amount of turmeric.

Q. Does Nattokinase contain Vitamin K?

A. No. Nattokinase is an isolated and purified enzyme extract from natto (a fermented soybean food), which does not contain vitamin K.

Q. Why do some capsules occasionally appear lighter/darker yellow than others?

A. It's not unusual for ingredients, especially those of botanical origin, to have some variance in color. The important thing is that the standardized compounds within the herbal ingredients are the same. When you see variations, just keep in mind that it is simply the result of being a botanical product.

Q. Why is silicon dioxide in this product?

A. Silicon dioxide is just there to make sure that the premium ingredients in Curaphen are properly mixed and measured so that every capsule guarantees the same effective, beneficial components. Many botanical ingredients are, by their nature, "sticky" and can tend to clump if they are not mixed with a minute amount of inert, harmless material. We never use extra ingredients in any EuroMedica® product unless required for quality reasons.

What to pair with Curaphen®:

These products work very well with Curaphen for specialized needs:

- **Rhulief Plus™** – Supports knee and joint flexibility and mobility with the same clinically studied combination of BCM-95® Curcumin and BosPure® Boswellia at the same beneficial levels.*
- **ArthroMed®** – Supports joint health, plus flexibility and comfort.*
