

FEATURED PRODUCT

ProHydra-7™

Source of Omega-7

Superior Sea Buckthorn Oil

ProHydra-7™ contains a clinically studied blend of sea buckthorn fruit and seed oil at an optimal ratio for health. This blend:

- Delivers 150 mg of Omega-7 per capsule
- Relieved dryness and improved skin hydration up to 48% in a clinical study
- Renews dry mucous membranes
- Soothes the gastrointestinal tract
- Enhances the health and elasticity of skin*

ProHydra-7 helps rejuvenate skin and mucous membranes – the tissues which line the eyes, mouth, gastrointestinal tract, vaginal and urinary tracts.*

Recommendations: 1 softgel daily. May take up to 6 times daily for advanced support, or as recommended by your healthcare practitioner. If pregnant or nursing, consult a healthcare practitioner before use.

Other Ingredients: vegetable capsule (corn starch, glycerol, carrageenan, disodium phosphate), sunflower oil, rosemary oil. No sugar, salt, yeast, wheat, gluten, soy, dairy products, artificial coloring, artificial flavoring, or artificial preservatives.

ProHydra-7™ features **SBA24®**, a *clinically-studied* Sea Buckthorn Oil that provides over 200 nutrients. **SBA24®** also contains nourishing essential fatty acids (including Omega-3, 6, 9 and Omega-7), otherwise known as palmitoleic acid. **ProHydra-7™** helps the body retain hydration where it is needed most.*

Of course, not all sea buckthorn products contain Omega-7 fatty acids. That's because Omega-7 is found only in the pulp of the berry, not the seed oil. However, the seed oil is rich in essential alpha-linolenic and linoleic fatty acids, for beneficial Omega-3 and Omega-6. Both the pulp *and* the seed oil supply high levels of natural vitamin E (tocopherols and tocotrienols) and plant sterols. **ProHydra-7™** provides an unbeatable combination of both!

This *complete* sea buckthorn extract, including the berry and seed, provides powerful benefits:

- Shown in a clinical study to relieve dryness and improve skin hydration up to 48%
- Renews dry mucous membranes throughout the body
- Soothes the gastrointestinal tract
- Enhances the health and elasticity of skin*

The ProHydra-7™ Difference

ProHydra-7™ provides a better sea buckthorn extract, sustainably sourced, harvested, and extracted with your health and the future in mind. It is truly a unique sea buckthorn supplement:

- Standardized for omega essential fatty acid content, *including Omega-7*
- 150 mg of Omega-7 per softgel
- Provides clinically studied SBA24® sea buckthorn pulp and seed oil extracts
- Supercritical CO₂ extract, no hexane or other harsh chemicals
- Hand-harvested to protect the berry from damage and oxidation and the plant for future crops

Frequently Asked Questions for ProHydra-7™:

Q. What is a supercritical extract?

A. When the most active and beneficial compounds of a plant have been identified and isolated for use in a dietary supplement or food, that product is called an “extract.” There are a number of different ways to remove these desirable compounds from the plant. Water and alcohol are two of the most well-known and commonly used materials (technically known as “solvents”). In fact, a tea bag in hot water is an example of a water extraction that almost everyone has at some time prepared for themselves. Supercritical CO₂, meaning carbon dioxide in a liquid form, is a special type of non-toxic solvent that is particularly good for extracting essential oils without damaging them or causing them to become rancid through oxidation. Supercritical CO₂ extract is the preferred method for obtaining a full spectrum essential oil extract, discarding the non-essential fibrous plant material. This process is a cold extraction that uses no heat. Supercritical CO₂ yields a very pure extract, with no heavy metals or potential for bacterial growth. Because it evaporates completely there is also no concern about contamination or residue left in the extracted materials.

Q. What makes this particular sea buckthorn extract such a premium ingredient?

A. Sea buckthorn berries are difficult to harvest. They must be removed from shrub-like trees covered in thorns. As a shortcut, some companies actually cut down the shrubs, freeze the branches, and shake them to make the frozen berries fall off. This is a poor choice for two reasons. Freezing and then shaking off the berries damages them and yields a poor quality, low nutrient extract. Cutting down the shrub as a harvesting method is not a sustainable practice. All of the sea buckthorn berries in **ProHydra-7™** are hand-harvested. This is labor intensive, and thus more expensive, but well worth it. It ensures that the plants survive to produce a crop year after year and allows us to offer a highly potent and effective product.

What to pair with ProHydra-7™:

- **EurOmega-3®** – Provides DHA/EPA in a biologically active, phospholipid form as it occurs in salmon for healthy heart, brain, skin, immune and nervous system support.*
- **BosPro™** – Provides clinically-studied boswellia with high AKBA levels for advanced lung and bronchial support.*
