Many of us don't get the level of vitamin D3 we need through our diets or exposure to sunlight. In fact, anyone living in a northern climate, working indoors most of the year, or who has darker skin, probably needs a supplemental source of vitamin D3.

Healthy bones and teeth *require* adequate levels of vitamin D3 in order to utilize and process calcium and phosphorus as it is absorbed in the intestines. For immune health, vitamin D to maintain a strong immune defense at a cellular level by regulating T-cell activity.\*

Aside from its benefits for bone health and the immune system, in clinical trials, higher serum levels of vitamin D are associated with improved mental function. Additional studies, particularly in older adults, have found that increased serum levels of vitamin D are associated with healthy brain function.\*

Despite the overwhelming evidence of health benefits, the recommended daily intake of vitamin D3 remains too low. Many experts recommend a much higher supplemental level.

**Vitamin D3 Chewable** provides the cholecalciferol, the body's preferred form of vitamin D3, in a convenient, great-tasting tablet. It's the right choice to support healthy bones, immune defense, cognitive function, and cellular health.\*

## Frequently Asked Questions for Vitamin D3 Chewable:

### Q. Why not vitamin D2?

A. Vitamin D2 is a common form of vitamin D, also known as “ergocalciferol” is less well-utilized because it must be converted to vitamin D3 by the body. Supplemental vitamin D3 typically shows much better use by the body than vitamin D2, because it doesn’t require this extra step.

### Q. Can’t I just get vitamin D from sunlight?

A. Even though our bodies do convert synthesize vitamin D3 following exposure to sunlight, most of us don’t spend enough time outdoors for this to happen regularly and for any sustained benefit. In fact, vitamin D3 levels are a major concern for individuals living in the northern latitudes, working indoors, or with darker skin. Having a reliable and convenient supplemental source of vitamin D3 simply ensures that you get the levels you need.

### Q. Can I give this to my kids?

A. No, **Vitamin D3 Chewable** provides an adult level of vitamin D, and is not intended for children.

### Q. What is the source of vitamin D3?

A. The source of vitamin D3 in this supplement is lanolin from sheep’s wool oil. The sheep are not harmed during the process, it is simply a co-product of the shearing and wool-producing process.

### What to pair with Vitamin D3 Chewable:

- **CuraPro**<sup>®</sup> – Provides powerful BCM-95<sup>®</sup> high-absorption curcumin, for strong antioxidant ability and healthy cellular support.\*
